

Create a Development Course in Blackboard

Get a head start on the semester with Development Courses in Blackboard.

A Development Course is intended to give instructors and their teaching assistants a place to begin work on future Blackboard courses.

1. From within an existing Blackboard course, navigate to the **Control Panel** and click **Course Tools**.
2. Click **More Tools (GW)**.
3. On the resulting page click **Create Development Course**.

Course Management

Merge Course Rosters

Merge courses in which you are an instructor into a new course

Create Development Course

Create an empty course shell to develop future courses

4. Enter a **Course Title** and click **Submit**.

DEVELOPMENT COURSE TITLE _____

5. The new Development Course will appear immediately on the My Blackboard and Courses pages.
