Creating a Multiple Choice Slide in TurningPoint

1. Open TurningPoint. Choose the PowerPoint Polling panel.

2. Click New and then Multiple Choice (other question types are available).

3. Type the question and answer texts. If a value is to be assigned to the slide and then tied to individual students, set the value in the bottom right corner. In this example, answer 3 would be set as Correct.

4. Reset slides before using the presentation in a live classroom setting. Press F5 to activate the entire PowerPoint presentation, or Shift+F5 to activate the current slide. Responses are tallied in the upper right corner in presentation mode.

5. When all responses have been sent in, click the mouse button to close polling and display results.
