Blackboard: Copy Content from One Course to Another

The Course Copy tool is a convenient way to reuse and adapt existing course materials semester to semester. A course copy won’t replace existing content in a course but add to what is already there.

1. Open the Blackboard course that has the course materials you would like to copy.

2. On the Control Panel, click Packages and Utilities then select Course Copy.

   Note: If you don’t see the Course Copy option, you may not be the instructor of the course. You must be the instructor of both courses to perform a course copy.

3. Under Select Copy Type, select the default, Copy Course Materials into an Existing Course.

4. In the Select Copy Options section, click the Browse button next to Destination Course ID.

5. In the new window, locate and select the course to which you want to copy and click Submit.

   Note: If you can’t find a course, use the search field at the top of the window or scroll to the bottom of the window to check for additional pages.
6. In **Select Course Materials**, select what you want to copy OR click **Select All** to copy everything. **Student grades are NOT copied in this process.**

**Note:** If you do not Select All review the following:

- **To copy Assignments**, select the Content Area where the assignment is (e.g., Assignments) AND Grade Center Columns and Settings.

- **To copy Tests**, select Tests, Surveys and Pools, the Content Area where the test link is (e.g., Tests), AND the Grade Center Columns and Settings.

- You may want to change the **Discussion Board** setting to Include only the forums, with no starter posts. If you don’t make this change, all of the original discussion threads from the previous semester will copy into the new course.

7. In **File Attachments**, keep the default option, **Copy links and copies of the content**, selected.

8. Click **Submit** to start the course copy process. You will receive an email when the course copy is complete. All copied content can be modified in the destination course.
