Schedule a GW Lecture Capture

Use GW Lecture Capture to automatically record your classroom lectures and make them available to students in Blackboard. All lecture capture classrooms record instructor audio and presentation materials; however, some classrooms are also equipped with a camera to record video of the instructor.

1. First, check your classroom’s technology to see if your class is eligible.

2. Open the Blackboard course for which you want to schedule the Lecture Capture.

3. Scroll down to the Control Panel, click on Course Tools, and then select More Tools (GW).

4. Click Manage Echo360 Lecture Capture Schedules.

5. Click on Create Schedule.

6. Enter your Course Meeting Details:
   - **Location of Capture**: Select your classroom from the drop-down menu.
   - **Recurring Capture**: Select if this scheduled lecture capture should occur more than once.
   - **Start Date and End Date of Capture**: Set the date range in which you want to capture your class.
   - **Day(s) of the Week of Capture**: Select the days of the week you will be capturing your class.
   - **Start and End Time of Capture**: Set the length of each capture.
   - **Auto-Publish Capture**: Select if the capture should automatically be made available to students.

7. Click Submit.

A GWU Lecture Capture link will be added to your Blackboard course menu through which you and your students can access recorded lectures.
